Answer machine number on sky

Whether you're chatting on weekends or wanting to chat with family and friends abroad, there's going to be a talk plan that suits you. Read on and let's see what you can get. What do I get from Sky Talk? Sky offers home phone packages: Sky Line Rental - The standard Sky Line rental where you only pay for the calls you make. Sky Talk Evenings and Weekends Extra - Includes British landline calls on weekends and evenings. Sky Talk Anytime Extra - Including calls to the UK landline 24/7. Sky Talk International Extra - Unlimited calls to landlines in 50 international destinations - plus mobile phones in Canada, Hong Kong, USA - anytime, anytime. The UK landline calls include numbers from 01, 02, 03 and 0870, for calls of up to an hour - so remember to hang up before 60 minutes are high and call back. All Sky Talk packages include 1471 and 141 features, with the option to activate caller display and automatic number retained also free of charge. For additional costs per month, you can also add some other call features to your plan. These include: voicemail, or an upgrade to Voicemail Plus (to record a personal greeting, save more messages and listen to your messages from any phone) call derive call wait Three way call ring back Last caller caller scaller reject reminder call Your phone can also send and receive landline texts, although it costs a few penny ice every time. What's good about Sky Talk? Sky is a quad-play provider so you can bundle talk with broadband, TV and mobile runs on the Openreach network, so there's a very wide availability of landline packages that are only available for international phone calls, according to Ofcom, aren't bad for customer service, what's bad about Sky Talk? Additional call features are expensive, with no bundling options for reduced prices Sky doesn't offer a free smartphone app for home phone customers like BT and TalkTalk not the cheapest line (although it's not the most expensive either) What else can I get from Sky? Take a look at everything Sky has to offer: Sky Broadband Sky Broadband Sky TV Sky Sky Sky Sky Sky Sky Deals and offers Sky Upgrades All Sky Packages 1 access to your mailbox. Take your phone and hear the dial tone. A stuttering dial tone indicates that you have new messages. Select 1571. 2 Listen to your messages. Once you have dialed 1571, an automated voice will inform you about your new messages. Follow the instructions to listen to your messages. 3 Managing messages. After you listen to a message, you'll be asked if you want to return, save, or delete the call. Follow us the language instructions. If you want to save the message, just select 1571 to listen to it at any time. 1 Select the main phone number. 2 Access your mailbox. Stay on the phone until you reach your voicemail. Press the asterisk (*) on the keyboard and, when prompted, enter your PIN. 3 Access new messages. Follow the instructions of the to listen to your new messages. 4 Managing messages. Follow the instructions to either return the call, save the message, or delete the message. Add a new question How can I record a personal greeting? It depends on the type of phone you own. Normally you listen to the instructions and it tells you which button to press to record this personal greeting. It usually says something about recording the message after the beep, but if you continue to have problems, be sure to look for the type of phone if you are looking to set up the greeting. Question How do I use voicemail? Hold down the 1 key. Enter your temporary password (the last four numbers of your phone number). To use this feature, subscribe to Mumsnet Premium - get first access to new features you see fewer ads and support Mumsnet. Start with Mumsnet Premium GreatGooglyMoogly Thu 05-Aug-10 12:07:57 Our phone line is with Sky and that gives us an answering machine function (1571), but our current phone also has an answering machine. It seems quite random to pick up missed calls first! I always check the display on the phone for messages, but rarely notice if the dial tone for the Sky messages is different. Does anyone know if I can turn off the Sky answering machine feature? OP Posts: | Vermdum Thu 05-Aug-10 15:54:33 I have a terrible feeling that you need to call Heaven and ask them to disable all services they offer, even the answering machine. I might be wrong, but I'm sure my parents blasphemed about it a few weeks ago. Try google. GreatGooglyMoogly Thu 05-Aug-10 20:11:00 Really? What do you mean by disabling all services? OP Posts: | Vermdum Fri 06-Aug-10 10:45:36 Every little thing - like caller ID, answering machine, saved numbers and so on. You need to call sky to get them to cancel or delete anything. Apparently, Discuss the Discussion Commenting on this thread you need to create a Mumsnet account. Already a Mumsnet account on Mumsnet? Log me in and I've just switched to sky talk for my line rental. I have a message and have no idea how I should access. What is the number for accessing your messages? I tried 1571 and it doesn't work. have you activated 1571? how do you know you have a message We have a flashing envelope on our phone display. Please reply quickly someone, I think we can get important messages! Which phone is it??. do you have a missed call?? try 1571!! Hey, I have a Binaton phone, but not sure which model. There is a small flashing envelope on the display, but if try 1571 it says! have no news. do you have a caller ad? If you think if the number for a caller appears, if they call, then yes. Dunno, if it's the same as mine, I only keep one on the handset and then it plays the messages. Kana, Master Socket, Router Statistics, Net Monitor, BT Speedtester 1) do you have an answering machine built in? 2) you can get all the calls, if so, look at them all. BRAINWAVE - it could be a text message from the sky, dial -0845 602 1111 and see if you have a text. Last edited by skypaulusplus; 20-01-09 at 02:45. 1) I have an answering machine built in, but it also says that I have no messages. 2) As far as the received calls are concerned, everything looks normal. What should I look for? BRAINWAVE - no texts I fear. TIP: As you know, if you have a message When you sign up for voicemail, you have a selection of notifications: Stutter dial tone only - you need to pick up the listener and listen to the stutter tone (on a cordless phone, press the on button to hear the sound) Visual message waiting indicator - a light on your phone will turn on or flash stutter dial tone and flash on your phone to check your messages: Choose from your home phone * Enter your PIN followed by the sign. Choose from the menu options and follow the steps. From any other phone in Saskatchewan dial your house number, wait for your voicemail to be picked up, and then press 7 during the greeting, or dial your local access number, press the button, and then enter your 10-digit phone number. Enter your PIN followed by the character . Choose from the menu options and follow the steps. If you choose your local access number outside of Saskatchewan, press the button, and then enter your 10-digit phone number. Enter your PIN followed by the character . Choose from the menu options and follow the steps. NOTE: Long-distance fees apply for checking your voicemail from outside Saskatchewan. From any Internet connection, see Check and manage your voice messages online. It is optional to use a PIN to access your voicemail in the UK. However, you must set up a voice mail PIN if you want to listen to your voicemail from another phone, or if you are abroad (you need to set up the PIN in the UK before you travel abroad). Select 759 from your phone. Enter the wrong PIN 3 times. This triggers a text from us with a new temporary PIN. Select 759 again and use the temporary PIN. In menu 3, press 3 (Change Settings) and then press 1 (Change PIN). Use the temporary PIN to follow the to change your PIN. Select 759 from your phone. In menu 3, press 3 (Change Settings) and then press 1 (Change PIN) and follow the instructions. Avoid using a PIN that is easy to guess, e.B. 1111, 1234, etc. Voicemail cannot be turned off completely. But to prevent people from leaving voice mail messages, turn off message recording mode. On your phone: Select 759. Press 3. Press 5, Press 1. With visual voicemail, you can view a list of your messages and choose which messages you want to listen to or delete without to address your voicemail inbox. Currently available on: Selected iPhones running iOS11.3 or higher Samsung Galaxy A71 Samsung Galaxy A90 (5G) Samsung Galaxy Note 8 Samsung Galaxy Note 10, Note 10+ and Note 10+ 5G Samsung Galaxy S8 and S8+ Samsung Galaxy S9 and S9+ Samsung Galaxy S10e, S10 (5G) and S10 Lite Samsung Galaxy S20, S20 (5G), S20+ 5G and S20 Ultra 5G - A mobile data connection A compatible phone The latest software (you need iOS11.3 or higher for iPhones). Get help from device support and search for the latest software. If you haven't already done so, you may be prompted to set up a PIN. Visual voice mail should then be enabled automatically. There are no additional charges for the use of visual voicemails in the UK or abroad. If you use the Callback function, charges may apply. See voicemail fees above. iPhone's Visual Voicemail can't be turned off, but you can use standard voicemail by dialing 759 on your phone. Samsung Galaxy S9 and S9+ Go to Settings on your phone. Select Voicemail. Turn Visual Voicemail on or off. To use the default voicemail, select 759 on your phone. Visual voice mail should be enabled automatically, but sometimes if you are using a phone that you purchased from another provider (not a Sky Mobile phone), you may need to make sure that you have the latest network provider software update (Carrier) installed. iPhones: Check if you have software updates, make sure you have a phone signal and a connection to mobile data. Go to Settings, tap General, and then over. Scroll down and tap Carrier. When an update is available, it appears as a prompt on the on-screen with instructions. If nothing happens, you have the latest update. Do you still have problems? iPhone: Reset your network settings Go to Settings, tap General, and reset. Select 'Reset Network Settings' and follow the on-screen instructions. Note that this also resets all stored Wi-Fi networks and passwords, APN and VPN settings that you used earlier. Android: Reset your network settings You must have the latest software installed on your phone. If your software is up-to-date but visual voice mail isn't automatically enabled, go to device support and turn it on manually. Need more help? Go to device support and search for visual voicemail. Save up to 20 messages, for up to 30 days each. Further help with the or using voice mail, see Device support and search for voice mail. To personalize your voicemail greeting and settings, select 759 and follow the instructions. Once you've created a personalized greeting, you can change it, but you can't completely remove it. Once you delete a voicemail, it will be permanently deleted and unfortunately you will not be able to get it back. To change it, select: **61 * 759 * 11 * XX. Replace the XX's with the time for which you want the phone to ring before it transmits calls to voicemail. The maximum time you can set is 30 seconds. Z.B. **61*759*11*25. That would change it in 25 seconds. Seconds. Seconds.
